

Issue Date: October 30th, 2020

Dear Valued Customer,

This notice is to inform you of changes affecting item(s) that you have purchased from Littelfuse.

Description of the Change:

- We are changing the vendor of both the low current switch and the rubber cap components featured in the following electrical battery disconnect kits: 00227068, 08097360, 08097364, 08097460, 08097464, 10843400, and 08097469.
- These products are not sold individually, but only featured as components of the parts above.

Reason for The Change:

- Our current supplier, one who had been supplying components to us since before the acquisition of Menbers S.p.A., will no longer provide products or utilize processes that abide by ATEX requirements.

Effective Date of the Change:

- Component stock has been secured that is compliant to such standards to last through production of November 2020; at that time, a running change will occur to components produced by our new vendor.

What You Need to Do:

- No action is required from you at this time. As we are coordinating this as a running change, supply will not be disrupted.

If you have any questions, please feel free to contact your Littelfuse Customer Service Representative or your Inside Sales Representative. We appreciate your business and our continued partnership.

Sincerely,

Zachary Naughton
Global Product Manager
