- 1: Customized design is available, please contact us.
- 2: All test referenced to 26°C ambient
- 3: Inductance tolerance +/- 20%
- 4: Inductance is measured with Agilent® LCR meter 4285A (or equivalent) at 1MHz/1V.
- 5: DC resistance is measured with HIOKI® micro-ohm meter RM3542 or equivalent.
- 6: Isat means that DC current will cause a 30% inductance reduction from initial value.
- 7: Irms means that DC current will cause coil temp. rising to 40°C whichever is smaller.

## Precautions for Handling

### Precaution for handling of substrate

Do not exceed to bend the board after soldering this product extremely. (reference examples)

- Mounting place must be as far as possible from the position, which is close to the break line of board, or on the line of large holes of board.
- Do not bend extremely the board, in mounting another components.  
If necessary, use back-up pin (support pin) to prevent from bending extremely.
- Do not break the board by hand. We recommend to use the machine or the jig to break it.

### Precaution for soldering

Note that this product will be easily damaged by rapid heating, rapid cooling or local heating.

Do not give heat shock over 100°C in the process of soldering. We recommend to take preheating and gradual cooling.

### Recommendable reflow soldering
