

Description

One, two and three pole thermal-magnetic circuit breakers with trip-free mechanism and toggle actuation (S-type TM CBE to EN 60934/IEC 934). Featuring a combi-foot design for both symmetric and asymmetric rail mounting. Available with auxiliary contact (1 x N/O or 1 x N/C) for status signalling. Two and three pole models are internally linked to ensure that both/all poles trip in the event of an overload on one pole, even if the actuator is held in the ON position. This CBE can be supplied in current ratings up to 32 A with a choice of characteristic curves. All screw terminals are recessed for safety. Approved to CBE standard EN 60934 (IEC 60934).

Typical applications

Process control equipment, robotics, machine tool control, communications systems, instrumentation.

Features

- Comprehensive approvals allow global use
- Current rating range from 0.1 A to 32 A
- Very small width of only 12.5 mm including auxiliary contacts
- High vibration resistance to DNV GL Class B for mounting with combustion engines, pumps, compressors
- Compliant with the relevant requirements of the railway standards DIN EN 50155, DIN EN 61373 and EN 45545 (detailed information upon request)

2210-T2..
2-pole

Your benefits

- Space and weight savings of at least 50 % compared to conventional MCBs
- Reduced assembly times thanks to integral auxiliary contacts
- Optimum equipment protection through fine grading of current ratings

Preferred types – for more details on all configurations please see order numbering code

Preferred types are E-T-A products most frequently used by E-T-A customers. We manufacture E-T-A preferred types in particularly high

volumes. Our preferred types are supplied at shorter lead times than non-standard versions.

| Preferred types | Standard current ratings (A) | | | | | | | | | | | |
|----------------------|------------------------------|---|---|---|---|---|---|---|----|----|----|--|
| 1-pole | 0.5 | 1 | 2 | 3 | 4 | 5 | 6 | 8 | 10 | 16 | 20 | |
| 2210-T210-K0M1-H121- | x | x | x | x | x | x | x | x | x | x | x | |
| 2-pole | 0.5 | 1 | 2 | 3 | 4 | 5 | 6 | 8 | 10 | 16 | 20 | |
| 2210-T220-K0M1-H221- | | | x | | x | | x | | x | x | x | |

Installation drawing

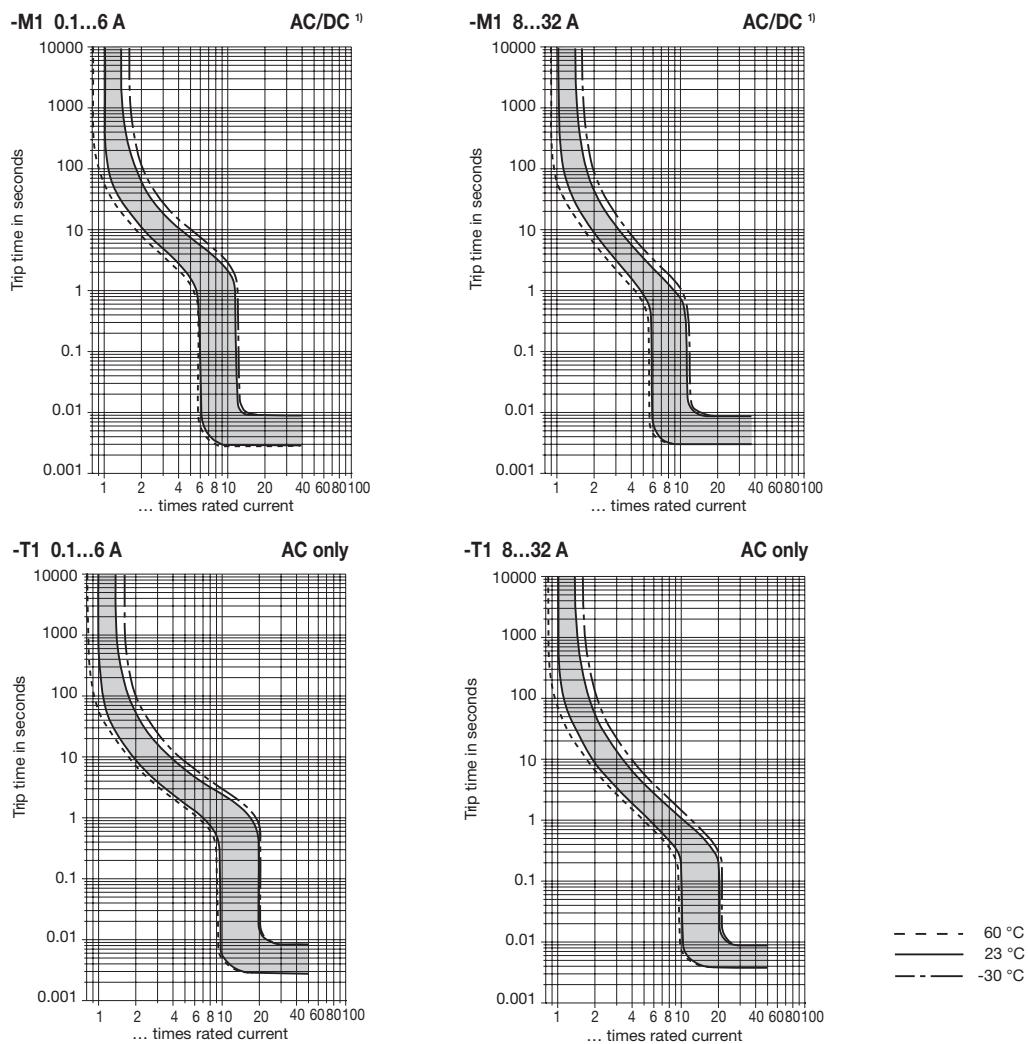

This is a metric design and millimeter dimensions take precedence ($\frac{\text{mm}}{\text{inch}}$)

Typical time/current characteristics

¹⁾ Magnetic tripping currents are increased by 30% on DC supplies.

Typical time/current characteristics

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section Technical information.

Multi pole devices: all poles symmetrically loaded. With single pole overload, thermal tripping will be at max. $1.7 \times I_N$ with curves F1, F2 and M1.

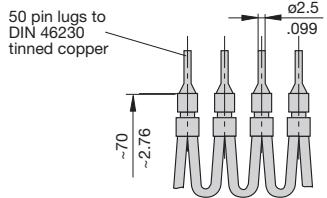

¹⁾ Magnetic tripping currents are increased by 30 % on DC supplies (curves F2, M1).

| Ambient temp. | °F °C | -22 -30 | -4 -20 | +14 -10 | +32 0 | +73.4 +23 | +86 +30 | +104 +40 | +122 +50 | +140 +60 |
