

BS EN/EN60335-1 ANSI/AAMI ES60601-1 BS EN/EN60601-1 IEC60601-1 TPTC00

■ Features

- 1.93"x0.94" compact size
- Medical safety approved (2 x MOPP) according to ANSI/AAMI ES60601-1 and IEC/BS EN/EN60601-1
- Suitable for BF application with appropriate system consideration
- No load power consumption<0.1W
- Extremely low leakage current
- Wide operating temp. range -35 ~ +85°C
- EMI class B for class Ⅱ configuration
- Protections:
 - Short circuit / Overload / Over voltage / Over temperature
- · No minimum load required
- · 3 years warranty

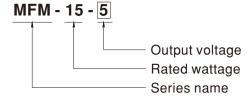

Applications

- Portable medical device
- Mobile clinical workstation
- Medical computer monitor
- · Medical examination instrument

■ Description

MFM-15 is a 15W high density and small size (49*23.8*23mm) AC/DC on board type medical power supply series. It features the operation for $80\sim264$ VAC, a low no load power consumption less than 0.1W, a high efficiency up to 87%, Class II (no FG) double insulation, outstanding dissipation, 5G anti-vibration, high EMC performance, 4KVAC isolation, etc. The design observes IEC/BS EN/EN60601-1 and ANSI/AAMI ES60601-1 version three with 2xMOPP level and ultra-low leakage current (<80 μ A). It is very suitable for BF (patient contact) type medical device or relevant equipment.

Model Encoding

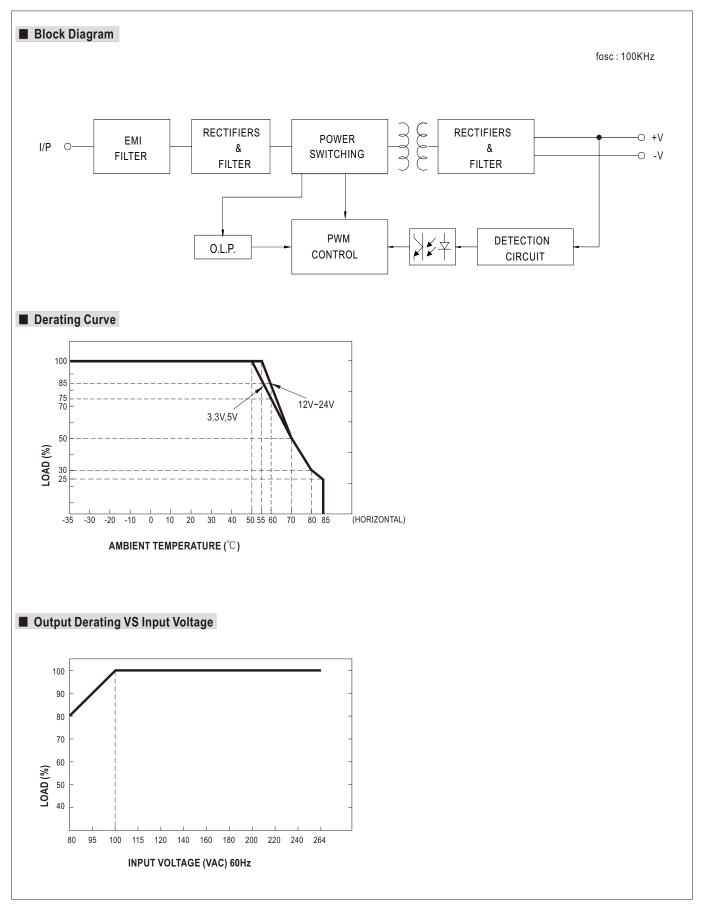

SPECIFICATION

		MFM-15-3.3	MFM-15-5	MFM-15-12	MFM-15-15	MFM-15-24

NOTE

- 3. 33% Duty cycle maximum within every 30 seconds. Average output power should not exceed the rated power.
- 4. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1 μ f & 47 μ f parallel capacitor.
- 5. Tolerance : includes set up tolerance, line regulation and load regulation.
- 6. Derating may be needed under low input voltages. Please check the derating curve for more details.
- 7. Touch current was measured from primary input to DC output.
- 8. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).
- 9. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)
