This product is shipped in the following condition, because it is equipped with push-down terminals.

()The terminal cover is retracted inside the unit.

(2) The screws for connecting the terminals are held in the up right position.

When the EMI/EMC Filter is grounded through the DIN rail, the proper noise attenuation may not be achieved.

Be sure to connect the protection earth (PE) of the EMI/EMC Filter body to the earth. At least one PE connection is required. Name Plate
